

The City Council Chamber is equipped with a Hearing Loop system that will provide people with hearing loss an improved audio signal. If your hearing aid is equipped with telecoils you should be able to receive the improved signal through your own hearing aid or you may use one of the four portable receivers available from the City Clerk at the Council Meeting.

With this new system we hope we are able to assist citizens with hearing loss become more involved in City activities and the progress initiated at the City Council meetings.

If you have questions concerning the system you may call Sarah at 712-279-6313 or Lisa at 712-279-6310. For additional technical information or a list of Frequently Asked Questions you can visit [www.hearingloop.org](http://www.hearingloop.org) , this is not a City of Sioux City website. Thank you!
