**38th Street Bridge over Perry Creek
Project Start-up**

The City of Sioux City Engineering Division announces the start of the 38th Street Bridge over Perry Creek Reconstruction Project. Construction is anticipated to start during the week of June 27, 2016. The scope of the project includes replacement of the 38th Street Bridge over Perry Creek and construction of approach pavement leading up to the bridge. The project will include sidewalk and underground utility work as needed in the vicinity of the project. During construction 38th Street will be closed at Perry Creek and traffic will be redirected along Hamilton Boulevard and Country Club Boulevard. This project contract is set up with 105 working days which should allow for a late Fall 2016 completion date. Project detour map is shown below. Additional project information can be seen on the project's website: www.sioux-city.org/engineering/3254.
