**18th Street Bridge over Floyd River
Rehabilitation Project Start-up**

The Engineering Division of the City's Public Works Department would like to announce the start of the **18th Street Bridge Rehabilitation Project (18th Street Bridge over the Floyd River)**. The work is anticipated to start on July 5, 2016. The scope of the project includes removal and replacement of the concrete deck on 18th Street Bridge, replacement of approach pavement and sidewalk, and reconstruction of portions of the combined use trail west of the bridge. During construction 18th Street will be closed at the Floyd River and traffic will be redirected as shown on the detour route map below. The recreational trail will also be closed near the bridge. This work is scheduled to be completed in 90 working days, which should allow for a Fall 2016 completion.
