## 2015 Annual Crack Sealing Project Startup

The City of Sioux City Engineering Division announces the start of the 2015 Annual Crack Sealing Project. This project involves the sealing of cracks and joints on pavements in various locations through town. Project locations include Morningside, the Northside, and Woodbury Heights.

As each section is completed the City's contractor, Knife River Midwest, will mobilize to the next identified location. Prior to the contractor starting work, informational door hangars will be delivered to affected residents. Project completion is scheduled on or before July 30, 2016. While work is actively underway and until the sealant has dried the affected street will be open to local traffic only.

Motorists are advised to reduce speed, drive cautiously, obey all traffic control signs, and barricades.
